PRODUCT SHEET

STALICO® Basic

Telescopic light mast on a concrete base

Basic light mast fully extended

STALICO® Basic Light is a telescopic mast mounted on a concrete base — ideal for construction sites, car parks and passageways. One person sets it up easily. The mast is made of hot-dip galvanised steel and is therefore weather-resistant. As standard it carries two powerful 150 W floodlights, and it can also take cameras or other equipment. Operates on 230 V.

BENEFITS

- Simple and robust — concrete base, no outriggers
- Set up by one person
- 2 × 150 W floodlights as standard
- Ready for cameras or other equipment
- Hot-dip galvanised — weather-resistant

TECHNICAL SPECIFICATIONS

Mast height	Telescopic 2.3 – 6 m
