A SECOND AND THIRD LIFE FOR YOUR MASTS

# Built once. Deployed again. And again.

STALICO® masts are built to stand outside for more than 15 years. With our service and refurbishment, your fleet keeps working with today's technology, in today's colours, for a fraction of the cost of new masts.

**15+ yrs**
outdoor service life

**< 1 week**
spare parts delivered

**3**
service vans on the road

**All towers**
refurbished in Beerse, Belgium

*Built to keep earning for decades.*

SERVICE

# One partner for the whole life of your mast.

You deal directly with the people who build your masts. No distributor chain, no waiting for a third party. From a quick repair on site to a full refurbishment in our factory.

1

### Direct support

Questions go straight to our engineers in Beerse, Belgium. Fast answers from the people who build your masts.

2

### Service on site

Three service vans for repairs and maintenance on your site or in your depot.

3

### Parts in < 1 week

Winches, cables, batteries and panels from stock, delivered within a week.

4

### Inspection

Mast, winches, cables, electrics and batteries checked. You get a clear report with what needs doing.

5

### Refurbishment

A full overhaul in our factory: the mast goes back out for a second or third life.
For all towers.

6

### Upgrade & rebrand

New camera technology, new energy system or new panels with your new logo or phone number.

SERVICE OPTIONS

| Option | What we do | Where |
|---|---|---|
| **Repair** | Fault finding and repair of mast, winch, cables, electrics or locks | On site or in Beerse |
| **Inspection** | Full check of mechanics, electrics and batteries, with written report | On site or in Beerse |
| **Preventive maintenance** | Planned inspection and maintenance of your fleet | On site or in your depot |
| **Refurbishment** | Complete overhaul: mechanics, new batteries, electrical check, new panels | Factory in Beerse |
| **Upgrade** | Latest cameras, recorders, routers, solar or fuel cell power | Factory in Beerse |
| **Rebranding** | New panels in your new house style, printed and fitted | Factory in Beerse |

REFURBISHMENT

# From 15 years outside to back on site.

Mobile camera masts stand outside day and night, in rain, wind, frost and heat, and are moved from site to site. Because STALICO® masts are built from hot-dip galvanised steel, the structure lasts. Only the technology ages. So we renew that.

## FOUR STEPS IN OUR FACTORY

**01 Mechanics**

Inspection and maintenance of the telescopic mast, winches and cables.

**02 Electrics & batteries**

New batteries and a full electrical check of the cabinet and wiring.

**03 New technology**

The latest cameras, recorders and connectivity, ready for your platform.

**04 New panels**

New logo, phone number or company details. Printed and fitted in Beerse.

Securitas camera masts in our factory in Beerse: refurbished, upgraded and fitted with new panels before going back into service.

> GR Technics builds, delivers and maintains our mobile camera masts. Masts that have stood outside for more than 15 years get a second life with new camera technology.
>
> Michelangelo Iannino · Solutions Delivery Manager · Securitas Belgium

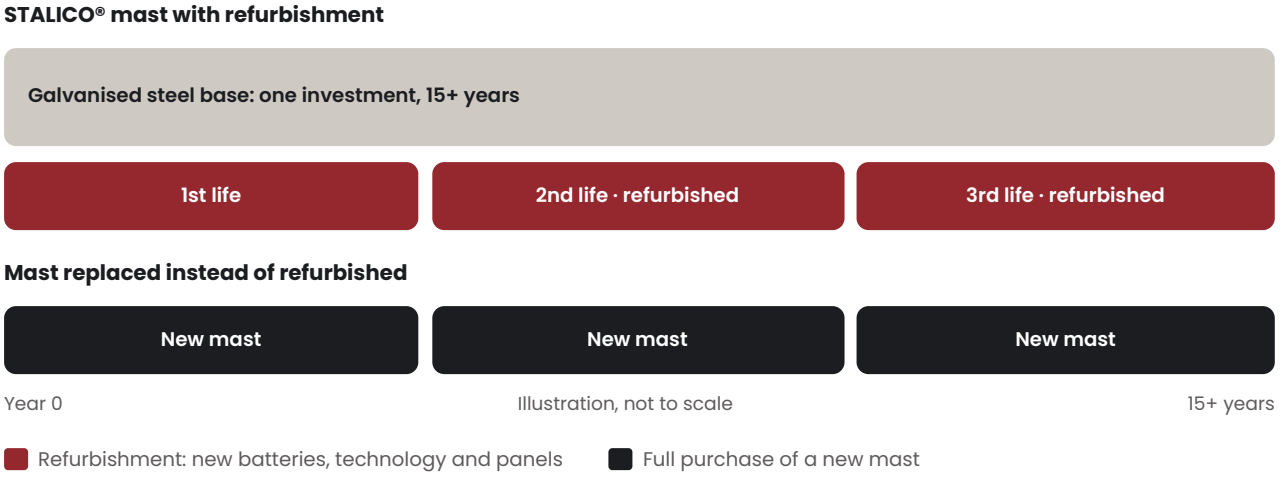

Back on the road: a fleet of masts leaves our factory, ready for the next site.

WHY IT PAYS

# Invest once in the base. Keep the technology current.

A mast that is replaced after a few years has to earn back its full price again and again. A STALICO® mast keeps its steel base for 15 years and more. You only renew what has aged.

## LOWER TOTAL COST OF OWNERSHIP

- ✓ One investment in a solid base, used for 15+ years
- ✓ Only batteries, technology and panels renewed
- ✓ New logo or phone number? New panels, not a new fleet
- ✓ Masts back in service quickly, earning again

## LESS WASTE

- ✓ Fewer new raw materials and less scrap steel
- ✓ Repaired and reused, not replaced
- ✓ Built, refurbished and serviced locally in Beerse
- ✓ All towers refurbished in Beerse

## Masts ready for another life?

Send us the number and type of masts. We plan an inspection and send you a proposal for repair, refurbishment, upgrade or rebranding.
